Specifications are subject to change without notice

- ◆ **Lightweight**
- ◆ **Easy-to-grip handles**
- ◆ **Internal lubber-lines**

The **TAC-100 Underwater Navigation Board** is the original navigation platform used by professional divers around the world. The TAC-100 integrates an underwater compass onto a rugged and lightweight high impact plastic console with easy-to-grip handles. The underwater compass utilizes a black compass card with luminous markings to indicate heading. Internal lubber-lines keep the diver on course. A built-in adjustable chem-light holder on the console illuminates the compass for night operations.

The TAC-100 can be supplied with an analog depth gauge, available in feet or meters.
